

The **NOCOSPRAY**® is a device from the **NOCOTECH**® range developed around a heating and ionizing turbine.

It allows to spread our disinfectants and insecticides in the form of dry mist and thus uniformly reach each cm<sup>2</sup> of the room treated.

Treatment of volumes from 10 to 1000 m<sup>3</sup>.

## ADVANTAGES

- Lightweight (5.9 kg) and compact
- Easily transportable thanks to its handle
- Many suitable accessories
- Traceability system: thanks to the USB port integrated into the **NOCOSPRAY**®, it is possible to control each treatment carried out.

Diffuser nose (venturi)

Handle

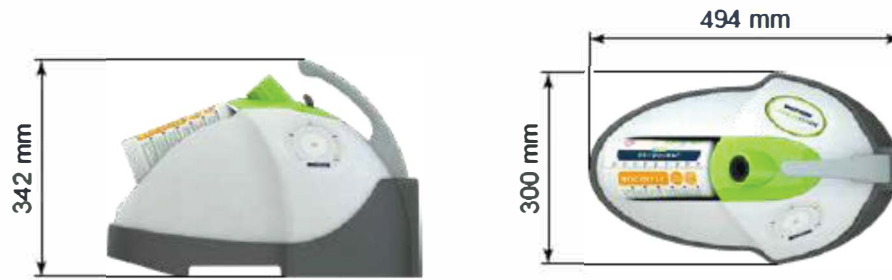

Mini USB port

Touchpad

## DIMENSIONS

## REFERENCES

Item description	Reference
NOCOSPRAY 2 – volumes from 10 to 1000 m <sup>3</sup> - 230 V	PSDMNS

## TECHNICAL CHARACTERISTICS

Main Features	
Device weight	5,9Kg
Compatible packaging	1 Liter
Diffusion outputs	1
Turbine rotation speed	22 000 trs/min
Maximum volume to be treated	1000m <sup>3</sup>
Average liquid flow	1000 ml/h

Terms of use	
Temperature	0 to 40°C
Hygrometry	10 % to 90 %
Atmospheric pressure	800 to 1060 hectopascals

Electrical Specifications	
Voltage	230V
Power	1000W
Frequency	50 to 60 Hertz
Nominal current	4,5A

## ACCESSORIES

To facilitate its use, the **NOCOSPRAY®** can be combined with several accessories.  
(Cf : NOCOTECH ACCESSORIES sheet)

## COMPATIBILITY (in drum of 1L)

### Disinfectants

Item description	Reference
NOCOLYSE 1L	PSDLNLNE1
NOCOLYSE FOOD 1L	PSDLNLF1
NOCOLYSE ONE SHOT 1L	PSDLNLOS1

### Insecticides

Item description	Reference
OXYPY 1L	PSILO1
OXYPY + 1L	PSILOP1

### Air freshener

Item description	Reference
OXYDOR 1L	PSALOR1

The 1L cans are also available in 5L and 20L formats. They will allow you to fill your 1L cans.
