NOCOTECH ACCESSORIES

OXYPY

OxyPy has a lethal effect on flying and crawling insects. These disinfection products are ready to use and must be used with a diffusion machine Nocospray or Nocomax Easy. Diffused in the form of gas (particle size: 5 μ), allows to destroy flying and crawling insects, parasites and larvae in an automated way. He is based on pyrethrin, Permethrin in combination with piperonyl butoxide. Non-toxic and safe! 4-weeks persistence.

PSILOY1	OXYPY 1L	75.00 € HT	90.00 € TTC
PSILOY20	OXYPY 20L	1 010.00 € HT	1 212.00 € TTC

OXYPY +

OxyPy+ has a lethal effect on flying insects, crawling insects, and bedbugs (larval and adult). These disinfection products are ready to use and must be used with a diffusion machine Nocospray or Nocomax Easy. Diffused in the form of gas (particle size: 5 μ) and has a lethal effect on flying insects, crawling insects, and bedbugs in an automated way. Based on pyrethrin, S-Methoprene in combination with piperonyl butoxide. Effectiveness against bedbugs proven in the laboratory. Non-toxic and safe! 4-weeks persistence.

PSIOYP1	OXYPY + 1L	150.00 € HT	180.00 € TTC
PSIOYP20	OXYPY + 20L	2 670.00 € HT	3 204.00 € TTC

NOCOBOX

The NOCOBOX are culture boxes with nutrients intended to highlight the presence of germs on surfaces. It allows us to verify the result achieved by our automated system of disinfection. It contains a nutrient fostering the bacterial growth, and so bringing out the presence of bacteria. To fit with Nocolyse, Nocolyse One Shot, and Nocolyse Food.

PSDMQKNB	NOCOBOX	39.00 € HT	46.80 € TTC
----------	---------	------------	-------------

NOCOTEST

The NOCOTEST are test strips intended for the semi-quantitative detection of hydrogen peroxide (H₂O₂) and peroxide in solutions. They make it possible to verify in particular that the diffusion obtained by our surface disinfection systems by the automated way is indeed homogeneous. NOCOTEST contains an organic redox indicator which reacts with hydrogen peroxide to form a colored oxidation compound.

PSMQKNT	NOCOTEST	56.00 € HT	67.20 € TTC
---------	----------	------------	-------------

All Nocolyse products are Virucide, Fungicide, Bactericide. It is 99.9% biodegradable, non-toxic, non-corrosive, non-allergenic, does not leave a residue and does not create germ resistance. Complies with standard NF EN 17272 April 2020.

Insecticide Accessories and Liquids, Air Freshener for the entire Nocotech product range

OXYDOR LIQUID

Oxydor is a deodorant product, effective on odor from organic or bacterial sources (urine, tobacco, bins, animals, industry...) A base of essential Oils, Oxydor is ready for use and must be used with a diffusion machine Nocospray/ Nocomax Easy or with a sprayer in local applications. Non-toxic and safe!

CLEANING MACHINES

Certified to the Standard Bionettoyage Vapeur d'Eau NF T72-110 March 2019

SP RANGE

The constant quality of the steam from the SANIVAP Generators guarantees excellent efficiency in order to ensure an optimal result of cleanliness and disinfection to also avoid re-fouling of the surfaces. They are specially designed for use up to 8 hours a day. They are very ergonomic. The cleaner is integrated into its Bio-Cleaning cart, which makes its use simple and very suitable for daily maintenance protocols. The wide range of adaptable accessories contributes to its efficiency and versatility.

SP400 Generator

The SP400 model is a 2800 Watt steam generator. It provides daily bio-cleaning of surfaces in premises, on furniture, equipment, and all medical devices, ect ... Perfect for communities, health establishments and the tertiary sector.

Machine net weight: 19 Kg | Machine dimensions: 42x30cm H43cm | Boiler power: 2800W | Pressure: 5 bars | Steam flow: 0 to 70 g / min | Temperature: 150 ° C Steam production water tank: 6L

-----------	-------	---------------	----------------

Générateur SP540H - WITH HYDROGEN PEROXIDE INJECTION

The SP540H model provides high-level disinfection thanks to its patented process combining steam and a 7.9% hydrogen peroxide solution. This device provides the advantages as a guarantee of disinfection efficiency, in particular on multi-resistant spores and bacteria, a reduction in associated costs, a preservation of the integrity of surfaces and equipment, 100% immediately biodegradable and also no polluting discharge but also no risk for the operator due to the very low concentration in the vapor of the solution used. It can also be used for other Bio-cleaning operations with steam only (without injection of hydrogen peroxide).

Machine net weight: 25 Kg | Machine dimensions: 42x30cm H48cm | Boiler power: 2800W | Pressure: 5 bars | Steam flow: 0 to 70 g / min | Temperature: 150 ° C | Steam production water tank: 6L | Additional water tank: 2L
