*Design your own spaces using the magic of fragrances*

- Unique and innovative system of professional fragrance diffusers adapted to places from 20 m<sup>2</sup> to 20 000 m<sup>2</sup>

[www.aromadesign.eu](http://www.aromadesign.eu)

# The new aromadesign concept:

A unique and innovative system of fragrance diffusers for professionals and end users

We offer a range of fixed or mobile professional diffusers adapted to spaces ranging from 20 to 20000 .  
Whatever your activity, your style, your volume, we offer you a tailored assistance to first select a model, then select fragrances among 300 fragrances, 100% natural chemotyped essential oils or compositions of fragrances, all thoroughly selected and produced in France under the control of laboratories (a certificate will be provided on request).

These professional diffusers are developed and made in France by the company Universal-Effects. They provide quality, reliability and efficiency. They are designed for an intensive 24h/24 and 7d/7 use. Using their electronic time switch, you can set your own diffusion times, depending on your requirements

Installation is possible in a technical room. Also possible is a connection to a ventilation system or an air conditioning system.

Give a new look to your spaces, create an atmosphere, and fumigate your premises.

Give a boost, modernize, and be surprising !  
Be the first to adhere to the new **aromadesign** concept.

- 3-year guarantee
- Fixed and mobile installation

Essential oils **100%** natural

**Sweet and subtle** fragrances

**Design of tailored** fragrances

# Power FragBox

## For your spaces, select at least one application

The first fragrance diffuser featuring a built-in ventilation system allows installing the **Power FragBox** in a remote technical room, in order to create a uniform diffusion in the surroundings. This advanced technology was designed using a very efficient and precise technology and 100% natural essential oils or compositions of fragrances. This diffuser is incredibly efficient, thanks to its unique blown-glass micro-diffusion system and its built-in ventilation system (*Small and Large*).

A double-diffusion (*Medium and X Large*) system is available, to either diffuse, continuously, two different fragrances or use the same fragrance in both tanks, to provide a stronger effect.

### Ideal for :
