Power Co2 Premium

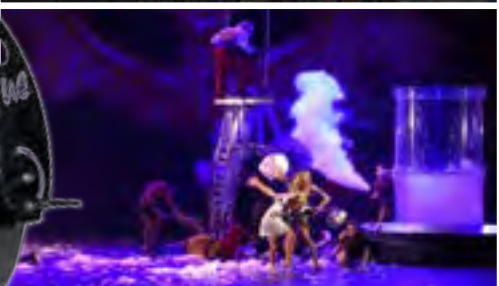

**The leader
in
Co2 effects**

Handle Co2 Machines

Our pack "Twin Colt-Co2" delivered with his handling bottle backpack will permit you to move easily and shoot the Co2 jet in all directions, as in Western style. This self operative system doesn't need neither electricity nor cable to run. A solo version with only one colt and without any backpack is also available. As each product in our range, this product is also equipped with a double outlet tube to avoid burn. Our "Power Colt-Co2" is also equipped with a support to customize it with a torch lamp like Maglite or a laser pen projector.

Power Gun-Co2

One Gun with Backpack

With a longer and more precise jet, our "Power Gun-Co2" is also delivered with a backpack, which gives you autonomy as a hunter, kind of "Special Forces". This system doesn't need neither electricity nor cable to run. A solo version with the gun only and without the backpack is also available. As all our range, this product is equipped with a double outlet tube to avoid burn. Our Power Gun-Co2 is also equipped with a support to customize it with a torch lamp like Maglite or a laser pen projector.

Power Gun-Co2 Solo

The real Bazooka Style

With our "Power Lancer-Co2" you'll have the Bazooka style. Also easy to use, but with a standard high capacity bottle, connected with the accessories of hose and connection, similar to all Co2 product of our range. With a long and wide jet, it will be perfect for all your animations. This product will dynamize your evenings and shows. As our colt and our gun, this system doesn't need neither electricity nor cable to run, thanks to the manual handle. As all products in our range, this product is equipped with a double outlet tube to avoid burns, and a 3 position direction handle. Our "Power Lancer-Co2" is also equipped with a support to customize it with a torch lamp like Maglite or a laser pen projector.

Power Jet-Co2 Duo

Cannon Machines for Big Jet

The Power Jet-Co2 Duo and Quattro generate great effects of intense smoke, cold, powerful and wide, which disappear instantly. Designed for large places and stages. These cannons have already toured the world and persuade a lot of customers. These are very simple to implement. There are 2 sizes with 2 power level: the Power Jet-Co2 Duo equipped with 2 injection nozzles, and the Power Jet-Co2 Quattro equipped with 4 injection nozzles. 2 types of control are available, STD direct power supply or by DMX-512 control.

Power Level Detector-Co2

2 gas input for 2 injection Nozzles

Power Jet-Co2 Quattro

Master & Slave - DMX or STD Control

The Quattro version has 4 arrivals for Co2 bottles, whereas there are only 2 for the Duo version. A machine in DMX version will permit you to control a second machine in STD version, on a separate control channel. This allows a simultaneous or individual use. We also offer remote control with our Power Box Controller, on which you can connect our Power Level-Co2 Detector, essential for these products with such high flow.

Power Jet-Co2 Quattro

4 gas input for 4 injection Nozzles

Power Jet-Co2 Mega*8

8 gas input for 8 injection Nozzles

Power Jet-Co2 Mega*8

The Power Jet-Co2 Mega is the most powerful version ever built in series, to achieve a huge effect of Co2 shooting. With a size of cannon of 50cm, an injection with 4 or 8 nozzles, and an integrated Venturi Effect in order to increase the flow, you will discover the ultimate advance of this technology. The result is really amazing !

to direct drive

Power Jet-Co2 Mega*4

The Biggest Co2 Machines in the World !

Two versions are available, one designed for 4 bottles and the other one for 8 bottles of Co2. As all the Power Jet-Co2 Machines, you can choose between 2 type of control, STD or DMX-512. The control module is on the back side of the machine, and allows the control of a second machine in STD version. The use of our safety pack is strongly recommended, and mandatory for indoor use.

Safety Pack & Controller

Interface Security Pack

Power Controller DMX

The safety pack is specially designed to control the level of Co2 in the air when performing effects with our machines. It allows an automatic control and automatically stops the Co2 jets in order to maintain optimum level of safety. It is strongly recommended to use it for indoor use, and often mandatory following several country rules. Please get info, and don't hesitate to protect people.

The power controller DMX16A 2OUT version Co2 will permit you to control 2 circuits of machines in manual mode FIRE or with the data connection type DMX-512.
